

WATERCROSS PUPPIES

Watercross puppies go home at eight (8) weeks of age and will have been taken to our vet for a health check and the first round of shots. They would have also been wormed every two weeks since birth at least 3 times. All of the puppies from Watercross Kennels come from AKC Registration, Micro chipped and dew claws removed. We will also supply you with a receipt of payment and as much instruction as you need.

We will never sell you a puppy that knowingly has a problem or one that we believe could have a problem in the future. If there are any issues that we know about, we will discuss them with you initially before we sell it. We have several litters a year in an effort to breed exceptional labs. Hopefully each generation being better than the last. We work very hard to select the most ideal match to have the best puppies possible.

We will try to keep a puppy from each litter to carry our bloodlines and to continue improving our dogs.

ALL LABRADORS ARE NOT THE SAME. We select for *terrific temperament, which is one of the main reasons that the breed is so well liked and #1 in registration for over 20 years with the AKC, *working ability so that your dog can retrieve, swim and play in the water which is what a lab is made to do; and for *beautiful confirmation so that your Labrador can grow to be a healthy, beautiful companion to you and your family, a hunting dog or a show prospect.

The price of all the puppies is the same--- what we believe the value of each litter is from a genetic ability and quality point of view.

We don't start selecting puppies until they are at least six weeks of age and we make the final decision at eight weeks and then we deliver them. We ask that you give us a \$500 refundable deposit to secure your puppy and we will work with you to get your puppy according to the deposit order and try to match your needs and requests as much as possible.... color, sex, temperament, etc. Once you have made your choice with us your deposit is non refundable.

We guarantee every puppy to have sound elbows and hips through 25 months of age with OFA certification and eyes certified by CERF to be normal.

We also help coordinate with you for puppies to be sold out of State, and we will get them ready for you and make special arrangements to meet you at the Airport.
